Think carefully about the how the letter shapes are joined...

- There are **two main joins:**
  - 1) a *diagonal join to half height*
  - 2) a *washing line join*
- With letter e, the *diagonal join* has to *sweep round* to form the e (*egg*) and the *washing line join* has to *dip down* to form the e (*are*).
- When a letter that ends with a *washing line join* ( o, r, n, w, x ) is followed by a letter in the *c group* ( c, a, d, s, g, o, q ) a *hook over* is *added* to the *washing line join* to *reach the starting point* of the next letter ( *oak, rag, van, want, exam* ).
